

Houston –New York City –Salt Lake City –Orlando–Austin–Dallas- Louisiana–Cincinnati–Boston
San Jose, Costa Rica–Brisbane, Australia

Thank you for contacting us regarding the funding of your in-ground mine assets. We are funding nearly all types of in-ground assets. Presently, there is a great market for gold, oil, silver, and silica.

The process is very simple and there are NO UPFRONT fees. Once we collect the necessary information, you will be dealing directly with the traders that will generate revenue for your project. There is NO repayment of the funds you will receive.

To properly process your funding, we will require the following:

1. Assay(s)/geological reports that show the value of your assets. The minimum amount we'll fund is 25% of the assayed value. This figure must be at least \$50M USD.
2. Proof of rights to mine the minerals/assets from the government (stamped by the government)
3. Proof of ownership of mining rights (land does not have to be owned, but you must have the rights)
4. An executive summary of the project including use of funds and the humanitarian benefits of your funding (i.e. job creation, the need for silica in today's world, etc.)
5. Color passport or US I.D. at 150%
6. The completed *in-ground mine submission form* from WCF
7. A signed service agreement with Walker Commercial Funding that gives us the exclusive right to present you to our funding source

Because of the huge influx of files, we ask that you submit all of info at once to mines@walkercf.com

Thanks, and we look forward to funding your project!
